## SUNSYSTEMS DELIVERS VALUE FOR MONMOUTHSHIRE HOUSING

**Monmouthshire Housing Association (MHA) was established to receive the housing stock of Monmouthshire County Council through voluntary transfer, after a successful vote by their tenants.**

The organisation's main purpose is to provide and manage high quality, affordable homes in the regions for those that need them. The association manages and maintains around 3,600 homes and 290 leasehold properties, as well as large numbers of garages within its estate.

When the new organisation was established, the ICT strategy identified the need for its own financial management system, separate from Monmouthshire County Council's, that would be fully operational from the day of transfer.

After an extensive tender process, Castle was appointed by MHA to implement Castle's integrated Infor SunSystems version 5 Housing solution.

**Steve Higginson, Director of Resources at Monmouthshire Housing Association said:**

"This was a challenging project in that we had to

have the system fully operational from day one in a brand new organisation and there would be no room for slippage against that deadline.

"Castle demonstrated an extensive track record of over 60 implementations in the housing sector as well as, specific experience of successfully implementing financial management solutions for new housing associations. Their fast-track approach to project management phased implementation and testing ensured that the project ran smoothly and was delivered on time.

"Castle's SunSystems Housing solution delivers a flexible, user friendly system that meets all of our financial management and reporting needs. The complete solution provided by Castle incorporates Financials, Bacs, Commitment Accounting, Component Accounting, Budgeting, eProcurement, Credit Control and dynamic links with Monmouthshires Housing system. Our decision making is better informed by immediate access to all our financial and accounting information. It offers impressive functionality and the ePurchasing module allows for speedy and efficient processing of invoices with excellent visibility and controls."

## CASE STUDY

### SUNSYSTEMS YN YCHWANEGU GWERTH AT DAI SIR FYNWY

Sefydlwyd Cymdeithas Tai Sir Fynwy i dderbyn stoc tai Cyngor Sir Fynwy trwy drosglwyddiad gwirfoddol, yn dilyn pleidlais lwyddiannus gan eu tenantiaid.

Prif ddiben y sefydliad yw darparu a rheoli cartrefi fforddiadwy, ansawdd uchel yn y rhanbarthau ar gyfer y rhai y mae eu hangen arnynt. Mae'r gymdeithas yn rheoli ac yn cynnal rhyw 3,600 o gartrefi a 290 o eiddo ar brydles, yn ogystal â llawer o garejys yn ei hystâd.

Pan sefydlwyd y corff newydd, nododd y strategaeth TGCh fod angen iddo gael ei system reolaeth ariannol ei hun, ar wahân i system Cyngor Sir Fynwy, a fyddai'n gwbl weithredol o ddiwrnod y trosglwyddo.

Yn dilyn proses dendro helaeth, penodwyd Castle gan Gymdeithas Tai Sir Fynwy i roi ei ddatrysiad Tai integredig: Infor SunSystems, fersiwn 5, ar waith.

#### Meddai Steve Higginson, Cyfarwyddwr Adnoddau Cymdeithas Tai Sir Fynwy:

"Roedd hwn yn brosiect heriol gan fod rhaid i'r system fod yn gwbl weithredol o'r diwrnod cyntaf mewn sefydliad newydd sbon.

Ni fyddai modd caniatáu i'r terfyn amser hwnnw lithro.

"Dangosodd Castle fod ganddynt brofiad helaeth o dros 60 o achosion o weithredu yn y sector tai, yn ogystal â phrofiad penodol o roi datrysiadau rheolaeth ariannol ar waith yn llwyddiannus yn achos cymdeithasau tai newydd. Sicrhaodd eu dull cyflym o weithredu a phrofi rheolaeth prosiect fesul cam fod y prosiect wedi datblygu'n hwylus a chael ei gyflwyno'n brydlon.

"Mae datrysiad Tai SunSystems Castle yn cyflwyno system hyblyg, hawdd ei defnyddio sy'n diwallu'n holl anghenion o ran rheolaeth ariannol ac adrodd.

Mae'r datrysiad cyfan a ddarperir gan Castle yn ymgorffori Elfennau Ariannol, BACS, Cyfrifyddu Ymrwymiad, Cyfrifyddu Cydrannau, Cyllidebu, eGaffael, Rheoli Credyd a chysylltiadau deinamig â system Tai Sir Fynwy. Mae'r penderfyniadau a wnawn wedi'u hysbysu'n well gan fynediad i'n holl wybodaeth ariannol a chyfrifyddol ar unwaith. Mae'n cynnig elfennau ymarferol trawiadol ac mae'r modiwl eBwrcasu yn caniatáu prosesu anfonebau'n gyflym ac yn effeithlon, gyda gwelededd a mesurau rheoli ardderchog."
